PLANT BASED OILS

HEMP	COCONUT
GOLDEN OIL	OIL
GREEN OIL	BUTTER
REFINED OIL	MCT
MIXED WITH MALTODEXTRIN	

Value by Nature

High quality berries, fruits and roots are picked from safe environments to become healthy products. They are processed with great care in a natural way to become powerful powders.

Our whole cranberry powders are a full-spectrum natural powder utilizing the whole cranberry made with seed oil, juice, skin and protein powder from the seeds of the cranberry. Our beautiful oils are made with state-of-the-art cold

extraction process that preserves the integrity and activity of tocotrienols. All products are tested on adulteration and MALDI-TOF, the most advanced analytical tool available, is used to identify and quantify PACs.

Berryceuticals values its strong relationships with suppliers and clients and is looking forward to growing fruitful collaborations.
