PRODUCER

FACTS & FIGURES

PRODUCER	BOUDJEBEL S.A. VACPA
PRODUCTION CAPACITY	13000 TON
CERTIFICATIONS	BRCS, BSCI, ECO CERT, FAIRTRADE, GLOBAL G.A.P, IFS, SMETA,
YEARS OF EXPERIENCE	20+

Boudjebel was founded in 1982 by the Boudjebel family, who have been exporting fruit items since 1957. Boudjebel is the current world leader in the export of Deglet Nour dates, exporting more than 13000 tons annually of this 'miracle fruit'. The dates are grown in desert oases in Tunisia by more than 600 smallholders. All farmers are carefully selected and evaluated on their farming practices and their extensive knowledge on how to care for their palm trees.

Boudjebel is committed to safeguarding the environment through sustainable development and strives for excellence through its eagerness to learn and progress. The company invests in the continuous development of staff skills and involvement through their integrated management system and trainings. Aware that quality begins in the orchards, Boudjebel launched a supply improvement program titled PASA back in 2002 to improve the quality of its products.
